What is Pollution Liability Insurance?

A Pollution Liability policy (also known as environmental insurance) is designed to offer protection for third-party environmental losses.

It responds to sudden, accidental and gradual pollution incidents. A policy can be taken out to cover a specific job or to cover all projects.

A Pollution Liability policy will cover you for gradual pollution events which are often excluded under a Public Liability policy, along with losses relating to asbestos.

When a pollution event occurs it can be difficult to know who to turn to; pollution liability insurance provides your business with access to technical and legal experts who are well versed in environmental exposures and will assist you to get back on track whilst dealing with strict regulatory conditions.
